Art Unit: 1711

1. The foreign priority document, Germany 10308755.9, filed 02/28/2003, has not been received.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-9, 23-26, and 60-67, drawn to a process, classified in class 524, subclass 591.
  - II. Claims 10-22 and 27-59, drawn to an apparatus, classified in class 366, subclass 136.
3. The inventions are distinct, each from the other because:
4. Inventions of Group I and Group II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practiced by another and materially different apparatus, such as one where the mixer and homogenizer are not connected by a conduit or one where the product to be re-homogenized is introduced to the homogenizer manually or by hand.
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1711

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication should be directed to R Sergent at telephone number (571) 272-1079.
